ELE/Q0125: Wafer Back Grinding Engineer

Brief Job Description

Wafer Back Grinding Engineer works on Wafer Grinding Process & responsible for preparing recipe (Process Parameters), Data Analysis, Yield Maintenance & Improvements, Productivity Improvements etc. all. He needs to know complete process of Wafer Grinding during IC Packaging to handle process. Create process for new products

Personal Attributes

The individual must have an aptitude for details along with analytical and problem-solving skills. The person should be able to work in co-ordination with others. The individual should be able to communicate appropriately, both verbally and in writing.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [ELE/N0132: Program Readiness](#)
2. [ELE/N0137: Cost & Productivity Improvement](#)
3. [ELE/N0138: Back Grinding Design & Verification](#)
4. [ELE/N0139: Supply Chain of Machine and Tools](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

ELE/N0132: Program Readiness

Description

Wafer Grinding - Process Engineer works on Wafer Grinding Process & responsible for preparing recipe (Process Parameters), Data Analysis, Yield Maintenance & Improvements, Productivity Improvements etc all. He need to know complete process of Wafer Grinding during IC Packaging to handle process. Create process for new products

Scope

The scope covers the following :

- Define Process
- Verify Process Parameters
- Prepare SOP & Support Design
- Manage Daily Activity

Elements and Performance Criteria

Define Process

To be competent, the user/individual on the job must be able to:

- PC1.** identify the wafer Structure
- PC2.** specify the Die Dimensions, Wafer Scrub Line's width, Internal Material Structure and thickness & Wafer Thickness
- PC3.** define Grinding Wheel types & size etc
- PC4.** set up all process parameters such as speed, Grinding Thickness, height, fiducial marks, orientation, vacuum level, Water Flow etc
- PC5.** specify & set to run dummy samples
- PC6.** set up all measurement instructions and see if all dimensions are within spec. or not
- PC7.** Highlight if any special requirement is needed
- PC8.** perform the measurement and see if all dimensions are within spec. or not
- PC9.** prepare to repeat until meeting the criteria if not meeting the spec criteria
- PC10.** prepare input major parameters into Standard Operating Procedure (SOP)
- PC11.** prepare full SOP and release to production
- PC12.** perform special requirements is needed

Verify Process Parameters

To be competent, the user/individual on the job must be able to:

- PC13.** identify the product parameters are done like mentioned below for the wafer verification of process
- PC14.** prepare a copy of the old recipe to perform a similar program
- PC15.** identify to make changes as per product specification requirement
- PC16.** perform to run dummy measurements, Calculate Process Capability (CPK), Process Performance (PPK), and other quality parameters

Qualification Pack

- PC17.** check the program need to save if all ok
- PC18.** perform to run real wafer
- PC19.** verify the real wafer using various quality and reliability checks
- PC20.** prepare for mass production, if all QCs are passed

Prepare SOP & Support Design

To be competent, the user/individual on the job must be able to:

- PC21.** use Automatic Computer-Aided Design (AUTO-CAD) as per organisation standards
- PC22.** prepare Process flow with clear specifications like Temp., Speed, Water Flow, Vacuum, Grinding Direction, Roughness, Grinding Material Type etc
- PC23.** prepare SOP in such a way so that it is more understandable to operators with pictures, visuals, data Charts etc.
- PC24.** identify training needs of operators on SOP flow
- PC25.** prepare traveling card with the defined process or program name/ code

Manage Daily Activity

To be competent, the user/individual on the job must be able to:

- PC26.** prepare traveling cards released to production are ok
- PC27.** perform regular inspection of programs
- PC28.** perform regular inspection of data such as yield, failure, etc
- PC29.** prepare for any emergency situation
- PC30.** prepare daily activity plan

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to identify the die dimensions and back grinding processes
- KU2.** the importance of analyzing the die attach film/material properties and thickness requirements
- KU3.** how to evaluate the curing and attaching conditions of die-attach film/material
- KU4.** how to recognize the structure of stacking (die thickness and substrate thickness with die attach film/material thickness)
- KU5.** how to specify the bonding force, pick & place location, curing parameters inside the oven, etc
- KU6.** the procedure of setting up all process parameters, such as bonding force, placements, attaching speed, adhesive thickness, wafer and substrate location moving speed, etc.
- KU7.** how to set to run dummy samples
- KU8.** the importance of taking measurements to ensure all dimensions are within specification
- KU9.** the importance of repeating the criteria until the specified criteria are met
- KU10.** how to turn major input parameters into Standard Operating Procedure (SOP)
- KU11.** the importance of preparing full SOP and releasing it to production, and considering the special requirements, if required
- KU12.** the importance of identifying the parameters for the new product verification process

Qualification Pack

- KU13.** how to prepare a copy of the old recipe to perform a similar program
- KU14.** the importance of identifying and making changes as per the product specification requirements
- KU15.** how to run dummy measurements, Calculate Process Capability (CPK), Process Performance (PPK), and other quality parameters
- KU16.** the importance and process of verifying the real product using various quality and reliability checks
- KU17.** the importance of preparing for mass production after all QCs are passed
- KU18.** how to use Automatic Computer-Aided Design (AUTO-CAD) software
- KU19.** the procedure of preparing process flow with clear specifications, such as temperature, speed, water flow, vacuumed, etc.
- KU20.** the importance of preparing the SOP with pictures, visuals, data charts to ensure it is more understandable to operators
- KU21.** the importance of identifying the training needs of operators on SOP flow
- KU22.** the process of preparing the travelling card with the defined process or program name/ code
- KU23.** the importance of ensuring the quality of all the travelling cards released to production
- KU24.** the importance of performing regular inspection of programs
- KU25.** the importance of performing regular inspection of data, such as yield, failure, etc
- KU26.** the importance of preparing for emergencies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to get the latest updates about the field of work
- GS3.** listen attentively to understand the information/ instructions being shared
- GS4.** communicate politely and professionally
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** co-ordinate with the co-workers to achieve the work objectives
- GS7.** evaluate all possible solutions to a problem to select the best one
- GS8.** take quick decisions to deal with workplace emergencies/ accidents

ELE/N0137: Cost & Productivity Improvement

Description

The NOS unit is about manage product quality, cost and improvement of productivity.

Scope

The scope covers the following :

- Wafer and Die Quality
- Yield Tracking
- Yield, Cost, and Productivity Improvement

Elements and Performance Criteria

Wafer and Die Quality

To be competent, the user/individual on the job must be able to:

- PC1.** define all wafer Dimension tolerance, wafer edge Chipping Size, wafer thickness & roughness, Keep out zone area, wafer warpage etc
- PC2.** define sample size for each lot to measure all dimensions
- PC3.** list down measurement technique in SOP for Operators
- PC4.** after Collecting Data, Do statistic's analysis if it is within specification release the lot to next step
- PC5.** define all consumables pack specifications clearly
- PC6.** inspect regularly for each consumable
- PC7.** any failure at Wafer Grinding should be passed through failure analysis
- PC8.** check the root cause of each failure
- PC9.** define short term and long-term actions or failures to reduce the failure rate
- PC10.** prepare an 8D report

Yield Tracking

To be competent, the user/individual on the job must be able to:

- PC11.** prepare yield data collection for each product
- PC12.** analyse the yield
- PC13.** analysis data using statistical methods
- PC14.** prepare ppt and present to management on WW bases
- PC15.** prepare necessary steps if the yield is lower than the target
- PC16.** record all failures along with actions to avoid future failure

Yield, Cost, and Productivity Improvement

To be competent, the user/individual on the job must be able to:

- PC17.** prepare strategies for further improvements
- PC18.** perform research and development (R&D) to improvements
- PC19.** identify broad material knowledge to reduce cost

Qualification Pack

- PC20.** perform the working principle of machines to improve UPH
- PC21.** prepare the design of experiments (DOE) expertise
- PC22.** knowledge of running statistical tools such as (Joint Manpower Program) JMP
- PC23.** perform regular interaction with the customer, supplier, and internal teams
- PC24.** knowledge of Auto CAD generated designs

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the importance of defining all die dimensions, stacking combination, and wire bonding parameters
- KU2.** how to define sample size for each lot to measure all dimensions
- KU3.** the importance of preparing the measurement techniques in the SOP for operators
- KU4.** the importance of analyzing the collected data and performing statistical analysis to determine if it is within the specification before releasing the lot to the next step
- KU5.** how to identify the consumables pack specifications
- KU6.** the importance of regularly inspecting for each consumable
- KU7.** how to identify any failure at die attach
- KU8.** the importance of ensuring wire bond passes through failure analysis
- KU9.** the importance of checking the root cause of each failure
- KU10.** the importance of defining the short term and long-term actions or failures to reduce the failure rate
- KU11.** how to prepare an 8D report
- KU12.** the importance of preparing the yield data collection for each product
- KU13.** how to analyze the yield
- KU14.** the importance of analyzing data using statistical methods
- KU15.** the importance of recording all failures along with actions to avoid future failure
- KU16.** the importance of performing Research and Development (R&D) and preparing strategies for further improvements
- KU17.** the working principle of machines to improve UPH
- KU18.** how to develop the design of experiments (DOE) expertise
- KU19.** the process of running statistical tools, such as the Joint Manpower Program (JMP)
- KU20.** the importance of regularly interacting with customers, suppliers, and internal teams
- KU21.** the process generating designs using Auto-CAD

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write work-related notes and maintain relevant records
- GS2.** read the relevant literature to get the latest updates about the field of work

Qualification Pack

- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate politely and professionally
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** evaluate all possible solutions to a problem to select the best one
- GS7.** co-ordinate with the co-workers to achieve work objectives
- GS8.** identify possible disruptions to work and take appropriate preventive measures
- GS9.** take quick decisions to deal with workplace emergencies/ accidents

ELE/N0138: Back Grinding Design & Verification

Description

The NOS unit is about to design and verify wafer back grinding processes and tools using semiconductor fabrication knowledge, CAD tools, and industry standards to meet customer specifications.

Scope

The scope covers the following :

- Design Creation for Back Grinding
- Understanding of Wafer Grinding Criteria
- Design Verification

Elements and Performance Criteria

Design Creation for Back Grinding

To be competent, the user/individual on the job must be able to:

- PC1.** auto CAD or equivalent design tool knowledge
- PC2.** knowledge of Semiconductor Material Used in Wafer Fabrication
- PC3.** knowledge of wafer fabrication process
- PC4.** support Design team to create an Optimized Product
- PC5.** should be able to do the reverse analysis to get specifications

Understanding of Wafer Grinding Criteria

To be competent, the user/individual on the job must be able to:

- PC6.** understanding of Critical and Normal dimensions Requirements that meet customer's final product specification
- PC7.** define the dimension's specification to meet customer requirements
- PC8.** knowledge of Joint Electron Device Engineering Council (JEDEC) standard
- PC9.** how to read customer POD
- PC10.** selection of grinding wheel
- PC11.** participate in Designing Keep out zone and minimum final grinding thickness

Design Verification

To be competent, the user/individual on the job must be able to:

- PC12.** verifying package dimension based on wafer geometry parameters
- PC13.** verifying scrub/street width profile
- PC14.** responsibility of Verifying Grinding wheel drawing
- PC15.** verify magazine drawing
- PC16.** verify cassette drawing

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** the use of Auto CAD and other equivalent design tools
- KU2.** the wafer structure and processing, and wire material properties
- KU3.** the importance of determining the customer requirements and collecting data from competitors' specs
- KU4.** how to perform reverse analysis to get the die to attach and wire bonding specifications
- KU5.** the importance of identifying the critical and normal dimension requirements as per the customer requirements
- KU6.** the importance and process of defining the dimension specifications to meet the customer requirements
- KU7.** the Joint Electron Device Engineering Council (JEDEC) standard
- KU8.** the customer bonding diagram
- KU9.** the importance of specifying the wire bonding material that fulfils the bonding drawing and electrical, mechanical, and thermal specifications
- KU10.** how to perform drawing activities bonding drawing
- KU11.** how to verify the die-attach staking structure
- KU12.** how to verify rubber tip for die attach and capillary for wire bonding drawing
- KU13.** how to identify magazine drawing and cassette drawing

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain the record of work-related observations
- GS2.** read the relevant literature to get the latest updates about the field of work
- GS3.** communicate politely and professionally
- GS4.** listen attentively to understand the information or instructions being given
- GS5.** co-ordinate with the co-workers to achieve the work objectives
- GS6.** plan and schedule tasks to achieve work efficiency
- GS7.** identify possible disruptions to work and take preventive measures
- GS8.** evaluate all possible solutions to a problem to select the best one
- GS9.** take quick decisions to deal with workplace emergencies or accidents

ELE/N0139: Supply Chain of Machine and Tools

Description

The NOS unit is about to conduct site acceptance tests and qualify consumables and raw materials for back grinding equipment, ensuring compliance with specifications, reliability, and production readiness.

Scope

The scope covers the following :

- Factory Acceptance test at equipment manufacturer site for Back Grinding
- Site Acceptance test at product manufacturer site for Back Grinding
- Consumable and Raw Material Qualification

Elements and Performance Criteria

Factory Acceptance test at equipment manufacturer site for Back Grinding

To be competent, the user/individual on the job must be able to:

- PC1.** prepare File Allocation Table (FAT) report creation
- PC2.** identify all specifications as per organisation standards
- PC3.** identify general machine specification (operation, main controller, the main panel should function as per requirements given to manufacturer)
- PC4.** prepare all equipment consumables specifications, dimensions and other parameters should be clearly defined by the process and equipment engineer
- PC5.** prepare equipment, as well as process parameters, should DMAT during testing at a site
- PC6.** prepare sample size required to buy off machines should be defined clearly with specification and CPK Requirements
- PC7.** identify the material through equipment along with the manufacturer's team
- PC8.** prepare a solid report to avoid any future issues
- PC9.** record all approvals as per organisation standards and formats

Site Acceptance test at product manufacturer site for Back Grinding

To be competent, the user/individual on the job must be able to:

- PC10.** prepare File Allocation Table (FAT) report creation
- PC11.** identify all specifications as per organisation standards
- PC12.** identify general machine specification (operation, main controller, the main panel should function as per requirements given to manufacturer)
- PC13.** prepare all equipment consumables specifications, dimensions and other parameters should be clearly defined by the process and equipment engineer
- PC14.** prepare equipment, as well as process parameters, should DMAT during testing at a site
- PC15.** prepare sample size required to buy off machines should be defined clearly with specification and CPK Requirements
- PC16.** identify the material through equipment along with the manufacturer's team
- PC17.** prepare a solid report to avoid any future issues

Qualification Pack

PC18. record all approvals as per organisation standards and formats

Consumable and Raw Material Qualification

To be competent, the user/individual on the job must be able to:

PC19. check out low cost and high reliable raw material and consumables

PC20. verify new material to design DOE

PC21. collect all the quality and realibility data for each characterization, feasibility, and build the qualification

PC22. generate PCN (Process Change Notification)

PC23. prepare qualification report and present to management

PC24. prepare to release LVM (Low volume Mass Production) & cowork with the production team to make a smooth transition to high volume mass production

PC25. determine the knowledge of characterization phase, feasibility phase, customer sampling phase, and qualification phase is required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. how to prepare the File Allocation Table (FAT) report

KU2. how to identify all specifications as per the organizational standards

KU3. the importance of ensuring the functioning of the main controller and the main panel as per the requirements given to the manufacturer

KU4. the importance of ensuring all equipment consumable specifications, dimensions and other parameters are clearly defined by the process and equipment engineer

KU5. the importance and process of preparing the equipment and process parameters

KU6. the importance of defining and preparing sample size required to buy off machines as per the specifications and CPK Requirements

KU7. the importance of preparing a comprehensive report to avoid any future issues

KU8. the importance of recording all approvals in the appropriate formats as per the organizational standards

KU9. the importance of ensuring the functioning of the main controller and the main panel as per requirements given to the manufacturer

KU10. the importance of preparing the equipment consumables according to the specifications, dimensions and other parameters defined by the process and equipment engineer

KU11. how to prepare the sample size required to buy off machines and the importance of ensuring it is defined clearly according to the specifications and CPK requirements

KU12. the importance of using low cost and highly reliable raw material and consumables

KU13. how to verify new material to design DOE

KU14. the process of collecting the quality and reliability data for each characterization, feasibility, and building the qualification

KU15. how to generate the Process Change Notification (PCN)

KU16. the process of transitioning from low volume mass production to high volume mass production

Qualification Pack

KU17. the characterization phase, feasibility phase, customer sampling phase, and qualification phase is required

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to get the latest updates about the field of work
- GS3.** listen attentively to understand the information/ instructions being shared
- GS4.** communicate politely and professionally
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** co-ordinate with the co-workers to achieve the work objectives
- GS7.** evaluate all possible solutions to a problem to select the best one
- GS8.** take quick decisions to deal with workplace emergencies/ accidents

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below.)
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre based on these criteria.
5. To pass the Qualification Pack, every trainee should score a minimum of 70% in every NOS.
6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
